

Reference List Format

The correct style to use for citing references in the Reference List section is discussed in detail in the most current *Publication Manual of the American Psychological Association* (APA style). Be careful to follow the exact punctuation, indentation, and format shown in the samples. The Reference List must be double-spaced. Note: If using the *APA Publication Manual*, all *example* references are single-spaced to save space in the *Publication Manual*. The Reference List should be alphabetized according to the first letter of each entry. Entries should be formatted using a hanging indent. Entries should begin flush left and the second and all subsequent lines should be indented. Italics are preferred over the use of underlining. The abbreviation for Page(s), p. or pp. is not used except in references to newspapers. Electronic sources must provide the date the information was retrieved, and also the name and/or address of the source.

The following are examples of how to cite a reference in the *Review of Literature*

1. One method of citing a direct quote in the research paper should be in the form: She stated, "The 'placebo effect', which had been verified in previous studies, disappeared when behaviors were studied in this manner" (Miele, 2001, p.276), but she did not clarify which behaviors were had been studied.
2. A paraphrasing of the text should be in one of the following forms:-as Smith (2002) demonstrated...
-as has been demonstrated (Smith, 2002).

Books

Book - One author:

Arnheim, R. (2001). *Art and visual perception*. Berkeley, CA: University of California Press.

Book - Multiple authors:

When a work has between two and six authors, cite all authors. When a work has more than six authors cite the first six authors followed by "et al." to indicate the remaining authors.
